PROFILE SUMMARY

A passionate frontend developer with a solid grounding in HTML, CSS, and JavaScript. Committed to designing visually engaging and user-friendly web applications. Possesses a keen eye for detail, strong problem-solving abilities, and effective communication skills. Driven by the pursuit of continuous growth, innovation, and making a meaningful impact in the field of web development.

SKILLS

HTML5 , CSS3 , JavaScript

Framework & Libraries :- React JS , Tailwind CSS Material UI, Redux , React context , framer motion ,

Tools & Platform :- Git , GitHub , VS Code , Vercel , Firebase

PROJECTS

SHOPZONE

- Created a dynamic e-commerce site with React and polished UI animations via Framer Motion.
- Styled the application using Tailwind CSS and enriched it with Material UI Icons.
- Ensured secure user authentication through Firebase.
- Managed state efficiently with React Redux, integrated React Slick for dynamic visuals, and provided user notifications using React Toast—all supported by the FakeStores API.

MOVIEFLIX

- Built a responsive movie app using React, Vite, Redux, and TMDb API.
- Enabled user search, genre selection, and access to trending movies.
- Utilized custom hooks and React Icons for added features.
- Focused on code quality and performance, ensuring a seamless user experience.

DEVDETECTIVE

- Built a web app with HTML, CSS, and JavaScript to search for GitHub developers and engineers.
- Integrated the GitHub API for user data, including images and bios, enhancing the user experience.
- Enhanced the interface with dynamic dark and light modes.
- Employed local storage to save user preferences and boost app usability.

CODEFUSION

- Created a CodePen editor clone using React, Vite, and Tailwind CSS.
- Integrated React CodeMirror for real-time code editing.
- Offers an interactive, user-friendly development environment.
